Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 37-41,49-51, drawn to a guide bar having means to attach itself to the clamps, classified in class 83, subclass 698.11.
 - II. Claims 42 and 52, drawn to a guide bar having a clamp screw and a clamp nut, classified in class 269.
 - III. Claim 43, drawn to a guide bar having a protection wall, classified in class 83, subclass 701.
 - IV. Claims 45,46,53 and 54, drawn to a guide bar having an angle portion, classified in class 33.
2. Claims 36,44,47,48 and 55 will be examined with the elected invention. Claims 36 and 47 link the inventions of groups I thru IV. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claims, claims 36 and 47. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The inventions are distinct, each from the other because the inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the guide bar having means to attach itself to the clamps as in group I could be used without the protection wall of group III, and conversely, the guide bar having the protection wall of group III could be employed with a guide bar that was permanently fixed to clamps, unlike the attaching means of group I. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
